

Pre-survey Questions with Answers

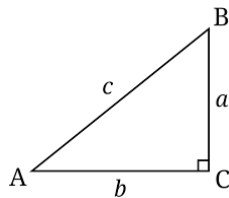

Question 1. Artificial Intelligence (A.I.) is about

- A. designing and flying drones on the computer
- B. making machines as intelligent as human
- C. collecting and integrating data from the computer
- D. writing codes in the programming software

Answer 1: B

(A.I. needs to learn from data before it can act like a human, while the data are usually collected in the real world by humans or with human instructions.)

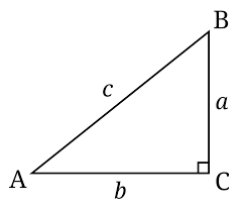

Question 2. Which one of the following choice is the opposite side of the $\angle A$?

- A. BC
- B. AB
- C. b
- D. c

Answer 2: A

Question 3. Which one of the following choice is the adjacent side of the $\angle B$?

- A. BC
- B. AB
- C. b
- D. c

Answer 3: C

Question 4. Which one of the following choices is NOT a programming statement?

- A. selection statements (also called conditional statements)
- B. iteration statements (also called looping statements)
- C. expression statements
- D. exclamatory statements

Answer 4: D

Question 5. Do you have any experience in flying drones, and do you have any experience in programming? (There is no correct answer, and feel free to choose one according to your experience.)

- A. No experience in flying drones and no experience in programming
- B. No experience in flying drones and some experience in programming
- C. Some experience in flying drones and no experience in programming
- D. Some experience in flying drones and some experience in programming
